

Innovation Office Update

Community Technology & Telecommunications
Commission

December 14, 2016

Since we last met, we've been busy...

Agenda

1. An old school tech metaphor
2. Themes for our conversation
3. A run-down of our project list by theme
4. Collaboration opportunities in 2017

Do you remember
defragmenting your
hard drive?

Innovation in an organization is kind of like this...

Instead of files, we focus on teams.

How do we organize around new opportunities and challenges while ensuring core city business gets done?

Teams

Redesigning

Design, Technology, and Innovation Fellows Program

DTI Fellows Program Goals

DESIGN, TECHNOLOGY
AND INNOVATION
FELLOWS

1. Address the increasing volume of needs for design, technology, and innovation projects
2. Introduce and standardize practices for user-centered design
3. Introduce and integrate open technology platforms and processes
4. Develop a creative culture that will inspire additional designers, developers, and other technologists to work for the city

Launched with CTM in June 2016

DESIGN, TECHNOLOGY AND INNOVATION FELLOWS

[illegible]

DTI Fellows Plans for Future

DESIGN, TECHNOLOGY
AND INNOVATION
FELLOWS

How we want to grow:

- Hire more people to meet demand
- Engage the public in projects
- Establish and support communities of practice
- Assist in recruiting and hiring throughout the city

Focusing on Outcomes

Zero Waste - Understanding Behaviors

Understanding Recycling Behaviors

DESIGN, TECHNOLOGY
AND INNOVATION
FELLOWS

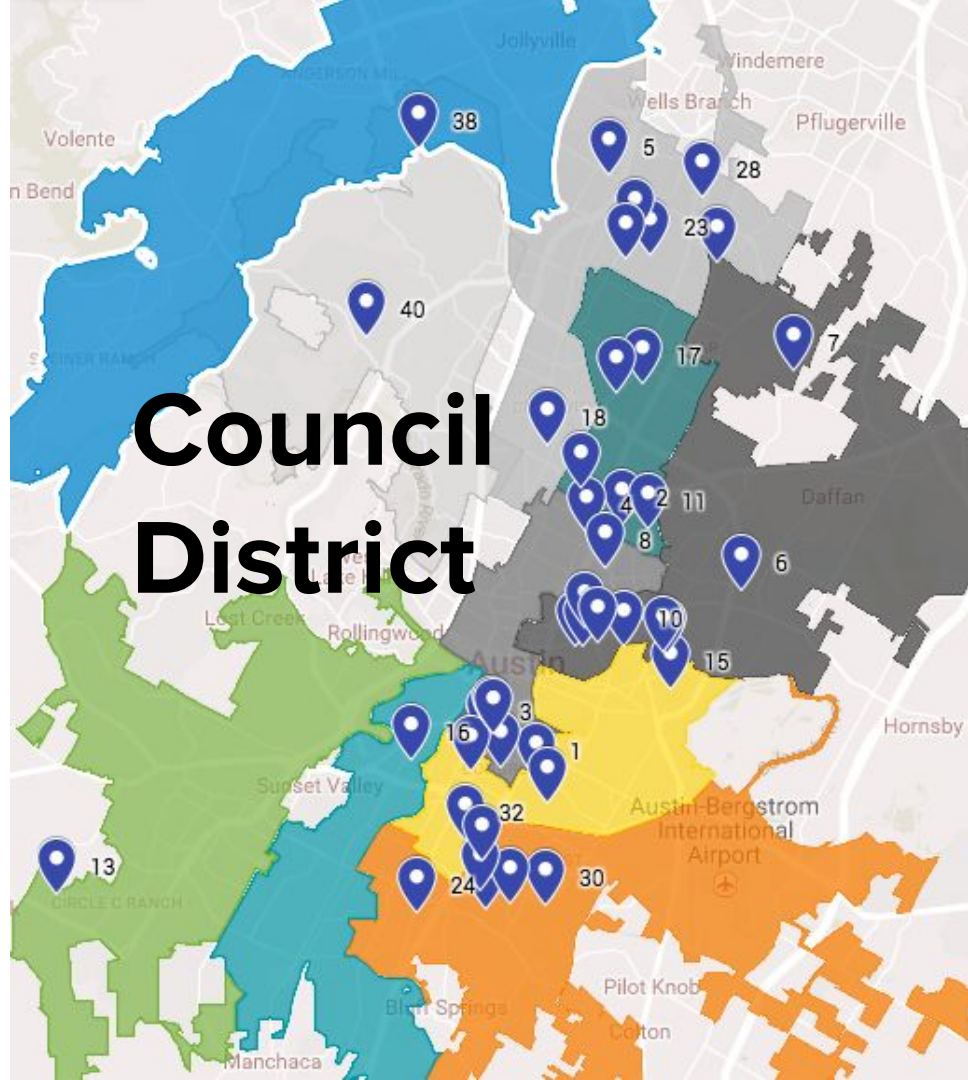

Project Goals

DESIGN, TECHNOLOGY
AND INNOVATION
FELLOWS

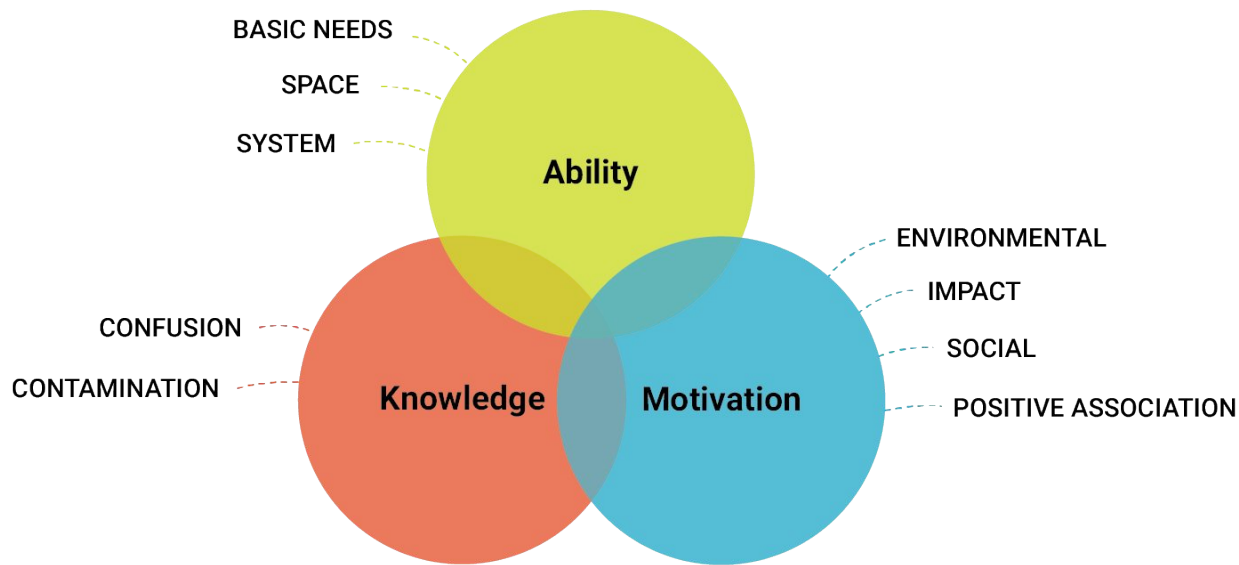

- Gain insight into the **perspectives and behaviors of Austin residents** and property managers regarding recycling and composting.
- Develop plans for how to **improve existing print and digital resources** to support Austin's zero waste goals.
- Test and refine new types of **language, imagery, and possible solutions** to support Austin's zero waste goals more effectively.
- Develop and use **new skills and methods** learned during the project.

Delivering Insights

People need strength in at least two areas to act.

Knowledge: Confusion

“When I don’t know, I base [the recyclability] on the closest item. K-cup = hard plastic = recyclable.”

- Rebecca

“This [pizza box] is cardboard as hell but you can’t recycle it.”

- Josh

“There can’t possibly be a full list, but if I knew the process, I could think for myself and make decisions instead of memorizing a list.”

- Dale

Insight:

Recycling rules are so confusing that almost nobody does it perfectly.

From insights to problem-frame

Knowledge Insights

How Might We...

Recycling rules are so confusing that almost nobody does it perfectly.

HMW provide just the right amount of guidance so people can confidently act?

Dirt & 'ick' reduces the perceived value of an item.

HMW correct the perception that dirty items don't have value?

Zero Waste - Activating Entrepreneurs

**Internal
Communication**

**In-Person
Service
Experience**

Web Resources

Austin Convention Center Website Rebuild

Project Goals

- Design a digital experience optimized for event planners, vendors, and event attendees
- Build a platform that can support additional integrations and functionality
- Enable staff to easily edit and improve content on their own
- Demonstrate the ability to quickly build and improve systems using open source technologies

WEBSITE REWRITE

"I'm big on transparency and how things work. Again, we're in the business of teaching people how to comply with rules and regulations... There's nothing that has an overview to using the convention center and how all the departments work."

- Bob, Sr. Planner

"Obviously it's an intense learning curve, because we had someone here who told me, 'not on this wall but on the interior wall,' ...and it didn't work. It was day of."

- Marie, Planner

Insight 2

Flat delivery of content handicaps planners' ability to gather necessary information and see their vision through.

Design Implication

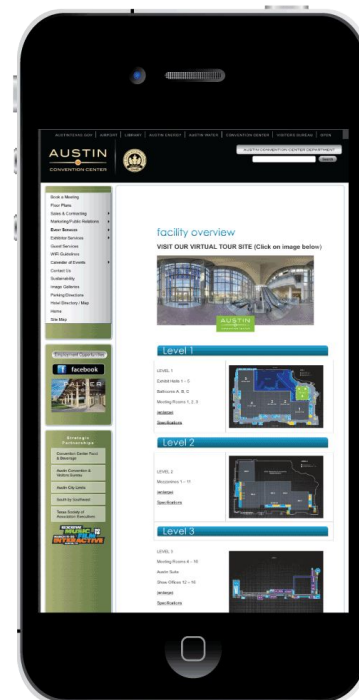

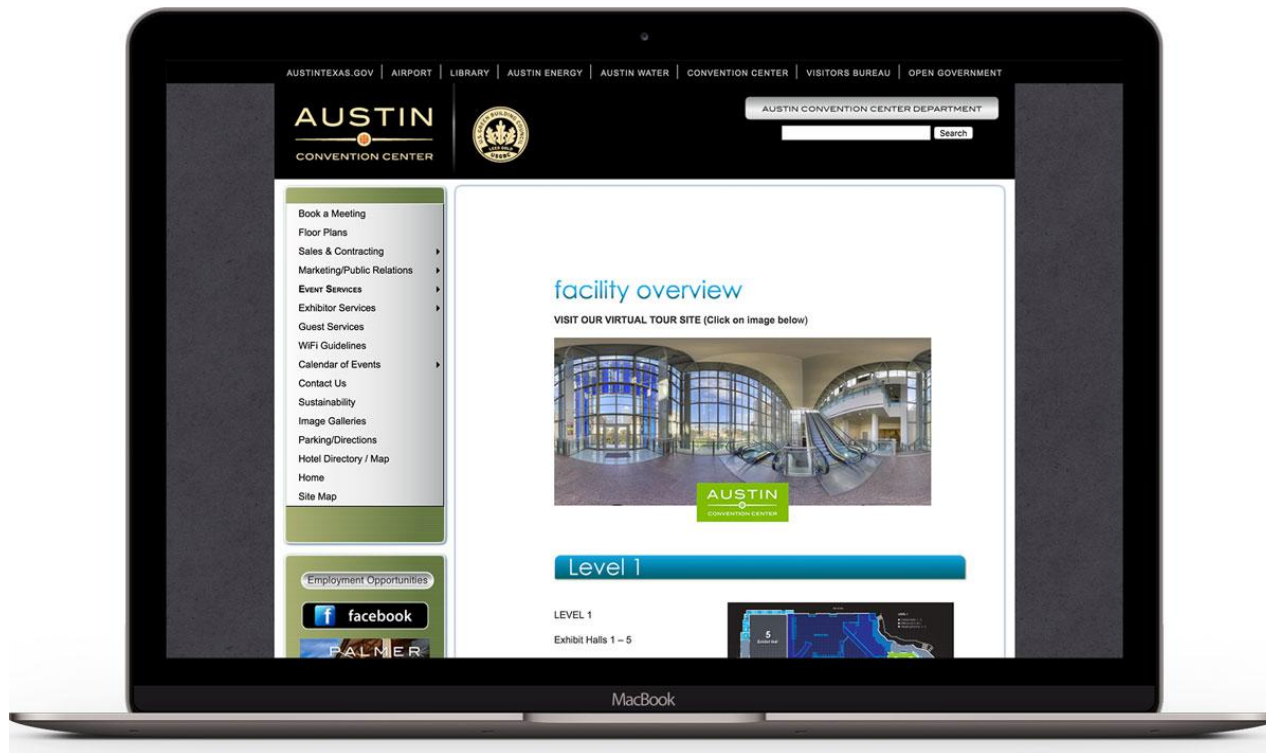

Our content structure will emphasize self-reliance and equips planners with tools to independently find what they need, at any phase in their timeline.

Open Government, Smart City

Wireless Communications Policy

Task Force Goals

Develop recommendations regarding

- Coordination and management of requests from private companies to install wireless telecommunications equipment in the public right of way (including possible attachment to street, traffic, light, electric distribution, and stand-alone poles) and on City buildings; and
- Build a more comprehensive strategy that positions Austin for initiatives such as SMART City and Internet-of-Things future.

The Challenge: Managing the Right of Way

VS

Clarify workshops improve collaboration

Wireless Communications Policy

Present/Near

	OUTCOME	METRIC	Avg
PUBLIC	Reliable, speedy connection Safety/accessibility Target marketing consistent service across city preserve aesthetics	public perception meet Great Street Adpts → some minimum level X% boxes per block	Minimize disruption Avoid dominance
CITY	• Access to fiber • revenue • close digital divide • smart city foundation • ability to get data • Efficient use of ROW • Minimize use of existing private assets	of gross revenue / \$ to City % increase of furniture soft → confident to deploy citywide minimum # providers per pole	Avoid disruption
PROVIDER	→ immediate installation of small cell on picked sites • Minimize time/cost • Take advantage of events • Fast permitting		- WiFi 1 - Parks

MEMORANDUM

TO: Rey Arellano, Assistant City Manager
Mark Washington, Interim Assistant City Manager

FROM: Rondella Hawkins, Telecommunications and Regulatory Affairs Officer

DATE: July 26, 2016

SUBJECT: Wireless Communications Policy and Procedures Task Force Recommendations

I. Introduction

As the communications industry expands and develops new technologies, there are increasing demands and proposals for the City to allow the placement of additional communications infrastructure in the public right of way (ROW). Absent City permission, wireless provider infrastructure is not allowed in the City ROW. This memorandum responds to the charge given the City of Austin Wireless Communications Policy and Procedures Task Force and provides recommendations that consider the identified trade-offs associated with allowing additional infrastructure in the right of way. The task of examining and making recommendations related to managing access to public buildings and land for use by Wireless Companies is not addressed by this memorandum.

II. Executive Summary - Recommendations

The Task Force recommends a phased approach for addressing requests to site wireless infrastructure in the public

Open Government Partnership

Accountability, Transparency, Participation,
Technology & Innovation

Feb Council passed
Resolution
20160225-017 to
compete for this
program

5 projects selected to
advance commitments,
amplify ongoing efforts

Announced
internationally last week

WHEREAS, OGP requires civil society organizations to be included in the co-creation of the reform commitments, meaning that the process of joining OGP represents experimenting with new forms of open policy-making; and

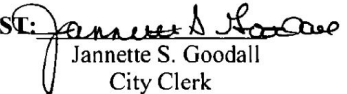

WHEREAS, the OGP is launching a new “subnational” pilot program designed to more proactively involve municipal government in its international effort to promote transparency, open policy making, government reform, and public trust in government; and

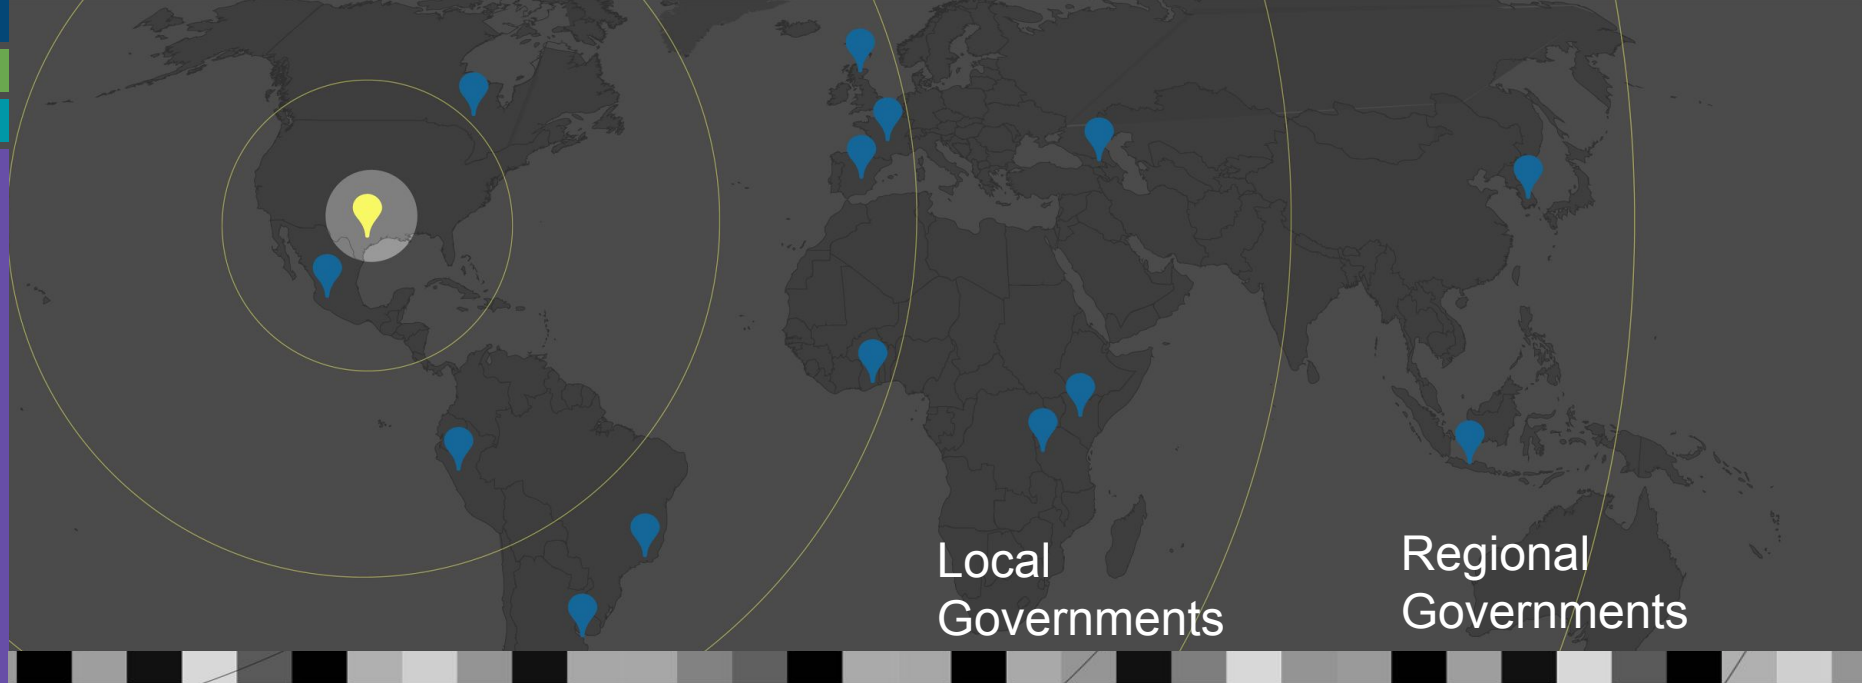

WHEREAS, pilot program participants receive dedicated assistance and advice from the OGP Support Unit and OGP Steering Committee to develop open government commitments and action plans, in collaboration with other pilot program participants; and

WHEREAS, the City’s transparency efforts and “best-managed” mission will benefit from this international assistance and collaboration, while the City’s contribution will help develop a global network for peer learning; **NOW, THEREFORE**,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF AUSTIN:

1. The City Council confirms its support for the City’s participation in the Open Government Partnership (OGP) subnational pilot program; and
2. The City Council confirms its support for the OGP’s efforts and principles and the City’s interest in receiving institutional support from the OGP.

ADOPTED: February 25, 2016 **ATTEST:** 
Jannette S. Goodall
City Clerk

Smart Cities Strategic Roadmap

Smart Cities Strategic Roadmap

Challenge: A rapidly growing portfolio of open government/smart cities initiatives, opportunities, and challenges

Desired outcomes:

- Increased collaboration, coordination, and knowledge sharing
- Enhanced readiness for intaking, evaluating, and adopting open government/smart cities initiatives

Approach: Facilitate internal City Departments, Open-Source from Austin technology community

Timeframe: January - April 2017

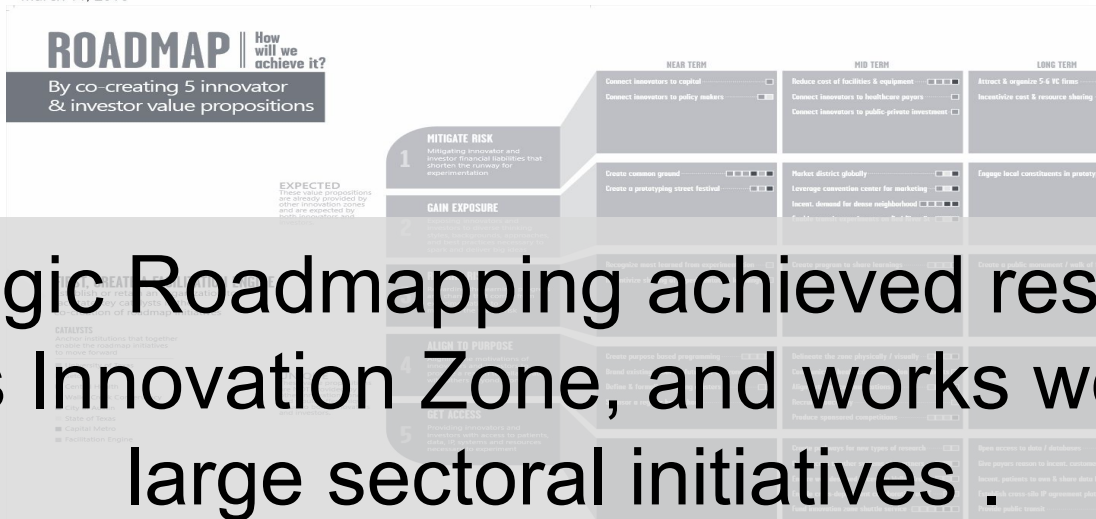

Strategic Roadmap

Future Opportunities for Our Collaboration

Looking ahead to 2017

1. How might we shape the concept of “open governance” together?
2. How might we shape user research and testing as joint listening, learning, and engagement opportunity?
3. How might the Commission partner and help hold us accountable on our Open Government Partnership projects?
4. How might we collaborate on the Smart Cities Strategic Roadmap?

Over to you...thoughts, questions?
